

BROOKS RANGE BIBLE CAMP

February 2026

ADDITION

Each summer the student pilots, volunteers and KAC staff put their training into practice by flying 6 to 8 small airplanes loaded with supplies and gear up above the Arctic Circle to put on Brooks Range Bible Camp (BRBC) at Crevice Creek for the kids from the surrounding villages. There are no roads to the Camp. There are no roads to the villages. Planes are a vital part of making this ministry happen! The student pilots have the opportunity to use the skills they are learning to facilitate sharing the Gospel of Jesus Christ with these kids! It is often the highlight of the Students' training!

It has been so fun to watch God grow our numbers at BRBC. Back in 2012 when we first started doing BRBC at Crevice Creek we had 27 kids and 19 teens. The Lodge was built, and it was adequate for the Campers and Staff.

For the last several years we have been averaging around 45 kids and 40 teens with about 35 staff. With our teen numbers increasing lodge set-up has been especially challenging which has made it difficult for staff to spread out among the campers and build deeper relationships or have as many conversations.

In order to help with this we plan to do a 24' X 32' ADDITION to the Lodge.

Brooks Range Bible Camp Lodge

2012

2012

2025

We have been able to make do with space we have in lodge, but no doubt we are popping at the seams. The lodge is a place where lots of relationship building and conversations that can have eternal value happens over mealtimes, crafts, Chapels, and Bible studies. Having more space will make it easier for camp to keep growing in size, have room for staff to easily sit next to campers to keep a conversation going, and do activities in rainy or poor weather. Campers are constantly asking how long until camp. The building may just be used for two weeks out of the year, but they are a very impactful two weeks that we want to be equipped to use well.

In order to do the addition the building supplies will need to be taken in to Crevice Creek when a group does the Haul Trip—A 13 hour truck drive, 30 mile ice road, and 40 miles snow machine trip, that is done each spring to get supplies into Crevice Creek. There isn't a road all the way to Camp. There will be 19,600 pounds of materials needed for the 24' X 32' addition. Lots of logistics are needed to get them bought, banded in transportable stacks, loaded on trailers, hauled over 13 hours, placed on the snow machine sleds, and hauled the last 40 miles into Brooks Range Bible Camp at Crevice Creek. This year's Haul Trip will be March 16-23. We are praying we have the funds for the building supplies by this time!

WOULD YOU HELP US DO THIS? Funds are needed for the building supplies, the fuel to get the trucks and snow machines all the way up there and back, and fuel that will be hauled in for the flying that will be done for the summer camps. This will be approximately \$14,000 for the supplies, \$10,000 for the fuel for the summer flying and \$4500 for the fuel for the Haul trip. We are so excited about this opportunity to make more ministry space to share God's story with these kids!
